PROVIDING EXCELLENT PATIENT CARE AND SUPERIOR RESULTS

USC Orthopaedic Surgery is one of the most comprehensive orthopaedic programs in the United States offering expertise in the diagnosis, treatment and rehabilitation of a wide array of orthopaedic disorders. Our clinicians provide care for a variety of orthopaedic subspecialties including: sports medicine, joint preservation and replacement, management of fractures and nonunions, hand surgery, foot and ankle disorders, musculoskeletal oncology, spinal disorders and treatment of infections.

To embrace a multidisciplinary approach, orthopaedic surgeons collaborate with specialists in plastic surgery, microvascular and vascular surgery, infectious disease and neurosurgery to bring the very best in patient care. In addition to our expert orthopaedic surgeons, the team includes physical and occupational therapists and pain management professionals who provide a high standard of care from the operating room to recovery.

The focus is on the patient, and the goal is to provide the best care possible throughout Southern California and the West Coast. From diagnosis to rehabilitation, we provide patients with comprehensive services across the continuum of care so that they can return to a full and healthy life.

USC ORTHOPAEDIC SURGERY

Recognized for Expert Care

The Epstein Family Center for Sports Medicine at USC Orthopaedic Surgery provides patients with exceptional operative and non-operative care to treat a wide range of sports medicine injuries, including ligament and tendon injuries, rotator cuff tears, cartilage injuries and fractures.

USC sports medicine clinicians are experts in their field. They serve as the Official Orthopaedic Medical Services Provider of the Los Angeles Kings, as well as treating the Junior Kings, USC Trojans football team and USC Intercollegiate Athletics.

Our clinicians use minimally invasive surgical techniques, arthroscopic surgery, microsurgical techniques and robotic surgery to optimize outcomes and return patients to work and play as fast as possible.
