

Keck Medicine of USC

We are **Keck Medicine of USC**, one of only two university-based medical centers in Los Angeles. We rapidly bring our world-class research from the laboratory to the bedside while training the next generation of medical experts.

When saving lives demands clinical trials, advances from brain mapping and genetic research, the latest surgical techniques, digital health innovations and more, Keck Medicine of USC is here. We are harnessing health care innovation to create personalized medical solutions for our patients.

Beyond Exceptional Medicine

- **Keck School of Medicine of USC**, a leader in clinical care and research, and the oldest medical school in Southern California
- **Keck Medical Center of USC**, which includes two private acute-care hospitals: 401-bed Keck Hospital of USC and 60-bed USC Norris Cancer Hospital, and four private Healthcare Centers
- **USC Norris Comprehensive Cancer Center**, one of the first comprehensive cancer centers established by the National Institutes of Health in the United States
- **USC Verdugo Hills Hospital**, a 158-bed community hospital serving the cities of Glendale and La Cañada Flintridge and the surrounding foothill communities
- **USC Care Medical Group**, composed of the Keck School of Medicine of USC faculty members and employed physicians
- **Outpatient facilities** at more than 40 Southern California locations and outpatient surgical centers

The Benefits of a University-Based Medical Center

Leading innovation through research

Keck Medicine of USC attracts the top scientific and biotechnology researchers who focus on breakthrough treatments in cancer, neurosciences, genetics, preventive medicine, stem cell/regenerative medicine, bioengineering, diabetes and obesity.

Shaping tomorrow's health care experts

Founded in 1885, the Keck School of Medicine of USC is proud to have been the first medical school founded in Southern California. Today, more than 5,000 full-time and volunteer faculty train more than 1,200 medical students, PhD and master's degree students, as well as those obtaining specialty physician training — more than 900 interns, residents and fellows annually — in an environment that fosters critical thinking in patient care.

Academic, multidisciplinary collaborations

As the health system arm of the University of Southern California, our medical and scientific experts collaborate with colleagues at the university's schools of business, communications, engineering, gerontology and life sciences, to name a few, as well as its athletics program. This multidisciplinary approach to scientific discovery offers the health care innovation that only a university-based medical center can provide.

Easy, local access to expert care

At Keck Medicine of USC, we bring our medical and scientific expertise to you. Our physicians and surgeons practice at more than 40 outpatient locations and various affiliated hospitals throughout Southern California. From Bakersfield to Beverly Hills and from Pasadena to Newport Beach, we make access to the best medical experts easier for you.

Global health leadership

We are leaders in the research and study of global health issues, whether it be worldwide pandemics or the challenges of an aging population. Our proximity to the Pacific Rim also makes us part of a growing medical tourism effort in China, international medicine in the Middle East and robotic surgery solutions in India.

Caring through innovation

Our approach to medicine — bringing together leaders in clinical care, research and education — generates innovations that make a real difference. Recent discoveries at Keck Medicine of USC are leading the charge in finding cures for Alzheimer's disease, autism, cancer, eye diseases and more. Collaborations between disciplines, neurogenetics and stem cell applications are all contributing to these efforts.

Excellence in clinical care

Keck Medicine of USC is a health system that offers its patients the care, the cures and the comfort that they and their families deserve. We are widely known for our excellence in:

- Cancer
- Cardiovascular
- Digestive health
- Neurology
- Neurosurgery
- Ophthalmology
- Orthopaedics
- Otolaryngology
- Pulmonology/Lung disease
- Spinal conditions
- Transplant
- Urology

Keck Medicine of USC is among the nation's most respected academic medical centers. Because of our comprehensive approach to medicine, we are able to offer our patients a diverse range of programs, medical services and private-practice departments. Highly trained specialists in each area provide every patient with an individualized, yet extensive care plan.
