

Keck Medicine of USC

BEYOND EXCEPTIONAL MEDICINE™

USC EPSTEIN FAMILY CENTER FOR SPORTS MEDICINE

Expert care for athletes of all levels

The **USC Epstein Family Center for Sports Medicine at Keck Medicine of USC** specializes in treating sports-related and recreational injuries affecting the knee, shoulder, hip, elbow, neck and spine, with convenient locations in Los Angeles, Glendale and El Segundo.

The sports medicine specialists of Keck Medicine have extensive experience treating USC athletic teams, including the USC Trojans football team. USC Orthopaedic Surgery physicians are the Official Orthopaedic Medical Services Provider of the Los Angeles Kings and USC Intercollegiate Athletics. The same level of care is provided to non-professional athletes and active people from all walks of life.

USC Epstein Family Center for Sports Medicine physicians collaborate across disciplines to ensure that patients receive the most comprehensive care, using specialized skills to assess and treat injuries, prevent pain or further damage, and train the muscles needed to participate in a particular sport.

TOP TIPS TO PREVENT SPORTS INJURIES

Use the tips from Keck Medicine's experts to avoid or minimize sports injuries:

Stretch and warm up

Invest a few minutes to properly warm up. Walk or slowly jog for a few minutes, then focus on the muscles and joints you will be working. A sports medicine practitioner can help determine the best stretches for your activity.

Build strength

Regular strength training develops the muscles and tendons, which help stabilize your joints.

Wear protective gear

Bike helmets, knee pads, face masks — whatever your activity requires, wearing the right gear can protect you. Choosing shoes that fit properly can reduce foot and ankle injuries.

Seek early help from an expert sports medicine team

Early intervention can help minimize damage and prevent re-injury, and seeking help early puts you on the path to proper long-term healing.

With more non-surgical and minimally invasive treatment options than ever before, you can get back to doing what you love faster.
