

USC CARDIAC AND VASCULAR INSTITUTE

Integrated Approach, Advanced Care

At the USC Cardiac and Vascular Institute (CVI), our multidisciplinary team of cardiologists and cardiac and vascular surgeons offers each patient an integrated treatment plan which is tailored to meet their unique needs, so there is no need to go anywhere else for the latest options.

ACHIEVING EXCELLENT OUTCOMES, DELIVERING INNOVATIVE CARE

The USC CVI offers state-of-the-art screenings, diagnostic tests performed by clinicians who are experts and leaders in the field, innovative noninvasive treatments and specialized surgical therapies, including endovascular stenting for aortic repair and transplant surgery. Whatever the level of care you require, our specialists work together to deliver the coordinated care plan that's best for you.

According to the American Heart Association, 1 in 3 American adults has some form of cardiac or vascular disease — high blood pressure, coronary heart disease, heart failure, stroke, peripheral artery disease or congenital cardiovascular defects.

Heart disease is the leading cause of death in the United States for both men and women and for all racial and ethnic groups. Each year, 1.5 million Americans suffer heart attacks — and one-third of those are fatal. Each day, nearly 2,500 Americans die of cardiovascular disease.

The CVI is dedicated to improving these statistics. Its physicians offer advanced, patient-centered care to individuals whose health is threatened by cardiovascular disease, while scientists are pursuing research that will lead to more effective treatment and prevention therapies.

USC CARDIAC AND VASCULAR INSTITUTE

AREAS OF EXPERTISE

- Adult congenital and structural heart diseases
- Aortic surgery and endovascular repair
- Cardiac transplant and mechanical circulatory support
- Cardiovascular surgery
- Carotid artery surgery and stenting
- Catheter ablation for complex arrhythmias
- Endovascular intervention
- Heart failure therapy
- Implantable technologies
- Interventional cardiology
- Peripheral arterial disease
- Thoracic surgery
- Valve repair
- Vascular surgery

EXCEPTIONAL TREATMENT FOR OUTSTANDING RESULTS

EXPERT MEDICAL TEAM

Cardiothoracic Surgeons

- Craig J. Baker, MD
- Mark L. Barr, MD
- Michael E. Bowdish, MD
- Robbin G. Cohen, MD
- Jonathan C. Cash, MD
- John David Cleveland, MD
- Mark J. Cunningham, MD
- Fernando Fleischman, MD
- Ming-Lu Huang, MD
- Raymond C. Lee, MD
- Matthew E. Powers, MD
- Jonathan Aaron Praeger, MD
- Vaughn A. Starnes, MD
- Ram Kumar Subramanyan, MD
- Winfield J. Wells, MD
- Luke Wiggins, MD

Cardiologists

- Eugene C. Pasquale, MD
- Michael W. Fong, MD
- Parveen K. Garg, MD, MPH
- Antreas Hindoyan, MD
- Ivan Ho, MD
- Ray V. Matthews, MD
- Vivian Y. Mo, MD
- Leslie A. Saxon, MD
- Jerold S. Shinbane, MD
- Jina Sohn, MD
- Helga Van Herle, MD, MS
- Andrew Zadeh, MD
- Junaid Ahmed Bakhtiyar Zaman, MD, PhD

Vascular Surgeons

- David G. Armstrong, DPM
- Sukgu M. Han, MD, MS
- Tanzim Khan, DPM
- William M. Lee, MD
- Gregory A. Magee, MD
- Miguel Francisco Manzur, MD
- Christian Ochoa, MD
- Vincent L. Rowe, MD
- Laura Shin, PhD, DPM
- Fred A. Weaver, MD
- Kenneth R. Ziegler, MD
